Lab

Google Colab

Lab - Google Colab

1. Open Google Colab and create a new notebook named "hello.jpynb".
2. Write a Python program in the notebook that prints "Hello, your_name" to the output. Replace "your_name" with your name.
3. Run the program in the Colab notebook to verify that it works correctly.
4. Take a screenshot of your Google Chrome browser showing the output of the program in the Colab notebook.
5. Save the screenshot to your computer.
6. Login to Blackboard and navigate to the lab assignment.
7. Upload the screenshot to Blackboard. Note that you don't need to upload the hello.jpynb file.
